Engineered Handling Solutions Since 1869

Paint-Free, All Stainless

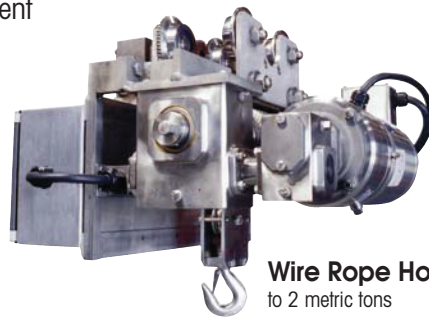

When you are serious about cleanliness, it's time to step up to an all-stainless handling product.

David Round is the leader in designing and manufacturing all-stainless material handling equipment for pharmaceutical clean room use. All of our lifting products are available with 100% external stainless steel components, because painted surfaces (even FDA approved epoxies) are no longer tolerated in many clean room environments.

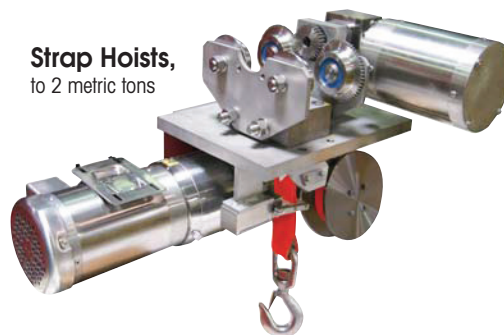

With Engineering and Manufacturing facilities in Ohio, we enthusiastically encourage your requests for either customized or standard equipment for pharmaceutical use.

Lab-Lift™
Strap Hoist

Wire Rope Hoists,

Steel Construction

What Makes it “Pharmaceutical Grade?”

Announcing the Lab-Lift™ strap hoist, designed from the ground up for controlled environments within pharmaceutical manufacturing applications.

- 1** Lubrication-free urethane-coated lifting strap eliminates contamination potential associated with chain or wire rope hoists: no metal-on-metal abrasion to create particulate.
- 2** Wiper helps seal all stainless internal components from clean room environment.
- 3** All stainless load hook and latch.
- 4** Designed for “cleanability.” Polished 304 stainless enclosure with rounded corners for easy wash down. Enclosure slides away to allow wash down of internal components.
- 5** All stainless steel components. Sealed gearing with food grade lubrication, clean room grade motors and motor brake, receiver and controls are enclosed in housing.
- 6** Smooth ground welds, flush mounted faces and plugged fasteners to help reduce potential contamination.
- 7** Wireless remote control.

Explosion Proof Hoists

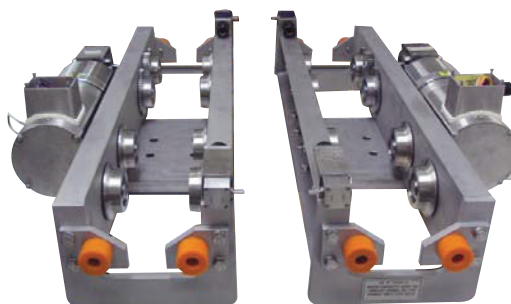

Roto-Mate™
jib crane
motorization kits

Trolleys

Wall Mounted Cranes,
to 5 metric tons

End Trucks,
manual and motorized

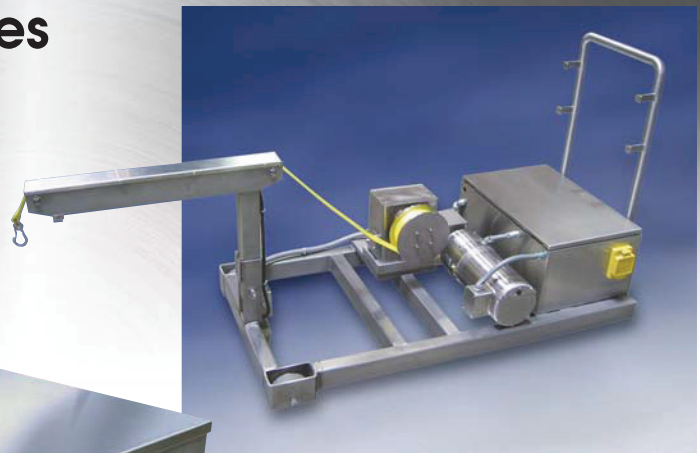

Free-Standing Jib Cranes,
in standard capacities
up to 5 metric tons

Manual Floor Cranes,
to 3 metric tons

Stainless Steel Floor Cranes and Lift Tables for Pharmaceutical Use

The Ruger Industries division of David Round designs and manufactures highly maneuverable floor cranes, which offer ergonomic and efficiency benefits over lift trucks. Both manual and full power units are available to help eliminate back-breaking activities while navigating standard door openings and narrow aisles. Construction is extra robust. All Ruger products meet or exceed ASME PALD Standards, which require design and build to 150% of rated capacity.

Custom Floor Cranes

Lift Tables

Totally enclosed hydraulics,
polished finish.

Established in 1869, The David Round Company remains one of the oldest and most experienced hoist manufacturers in the world. Major corporations and engineering firms routinely ask us to produce both standardized and custom-engineered material handling equipment.
